

T14 RAINBOW TILE MATE WIDE ADDITIVE

ADMIX FOR ROFF CEMENTITIOUS TILE GROUT FOR IMPROVED PERFORMANCE

RAINBOW TILE MATE WIDE ADDITIVE

DESCRIPTION

Roff RTM Wide Additive is a white, polymer emulsion to be added in Roff cementitious tile grout to enhance the performance properties and durability of the tile grout. Addition of Roff RTM Wide Additive with Roff RTM grout helps to impart more flexibility, strength, water & stain resistance, abrasion resistance and to fill wider joints between tile and stone.

STANDARD COMPLIANCE/ SPECIFICATION

Roff Rainbow Tile Mate Additive complies to CG2W requirements as per "BS EN 13888:2009 - Requirements, evaluation of conformity, classification and designation gouts for tiles and ISO 13007-Part 3 : Terms, definitions and specifications for grouts".

AREA OF USE

Surface to be grouted	Area of application				
All types of ceramic tile, glazed & porcelain tiles,	Floor and walls, internal & external area [*] ,				
vitrified & fully vitrified tiles, natural stones [*] , large	domestic applications, commercial applications [*] ,				
format tiles, glass mosaic tiles.	wider tile joints up to 6 mm.				

*Note :

- 1. For highly absorbent natural stones/ marbles which may form a wet or colored patch when tile grout is applied, do sample test to check for possible staining. It is recommended to use suitable Roff Impregnating sealer on all sides & mask the tiles before grouting.
- 2. For application on any other substrate, please contact Roff personnel for technical assistance.
- 3. Sometime, slight variations in shade of grouts with additives compared to normal cementitious grouts due to color fastness.

FEATURES AND ADVANTAGES

- Easy to use & clean Just mix with Roff RTM grout on site, ready to use.
- Polymer emulsion Impart flexibility, water & stain resistant, abrasion resistant.
- Suitable for varied tile and stones Ceramic, vitrified, marbles, granites etc.
- Crack free and less of shrinkage reduces the chances of water seepage.
- Durable Enhances compressive & flexural strength and shock resistance.

LIMITATIONS

- Do not use in areas which are exposed to harsh chemicals, stagnant water & extreme conditions. Use Roff RTM Epoxy/ Roff Starlike for these areas.
- Adhesives/ tile grouts for ceramic tile, bricks and stone are not designed as replacements for waterproof coating. Use Roff waterproofing coating before tiling for wet area.
- Do not use acid to clean joints. Use Roff Cera clean for cleaning purpose.

APPLICATION INSTRUCTIONS

SUBSTRATE PREPARATION

- Ensure 24 hours time interval for grouting after tile fixing.
- The joints must be dry, clean, free of dust & adhesive.
- Emptied at least 2/3 of the tile thickness depth.
- Before grouting, make sure that the installation the adhesive has set and released most of its moisture. The joints should not be wet during work.
- Put masking tape by side of grouting space or sealer if necessary.

MIXING

- Shake the bottle prior to mixing.
- Take RTM Wide additive into a clean mixing pail. Add RTM Powder and mix thoroughly by hand or with a slow speed mixer (<300 RPM).
- Avoid entraining air by mixing at very high speed or by over-mixing.
- Make sure that uniform color & lumps-free consistency is achieved.
- Allow the mix to slake for 2-5 minutes and remix.
- Use the paste within 60 minutes from mixing.

APPLICATION

RAINBOW TILE MATE

WIDE ADDITIVE

- Hold the float at a 90° angle and pull it at a 45° angle diagonally across the joints and tile to avoid pulling out the material.
- Work in small areas to have better control on removing the excess grout from joints and surface by moving the squeeze diagonally to the grout lines.
- Ensure that joint is filled completely, and grout is not just sitting on top.

CLEANING & FINISHING

- Clean off the surplus grout from tile joints and tiles within 30-45 minutes/ before the product dries.
- Initially use a rough textured sponge dampened with water to remove the grout residue.
- Use the damp sponge in a circular motion and keep it relative to the tile surface to achieve the flush joint & taking care not to drag grout from the joints.
- Clean off any light residue of tile grout left on the tile surface using an alkaline detergent/ Roff tile cleaner without disturbing the joint finish.
- Tools and containers should be cleaned using clean water when the grout is still fresh.

PRECAUTIONS & NOTE

- Do not apply on wet/damp tile joints. Always apply on completely dry tile joints.
- Do not over-mix the material. Over-mixing can reduce the pot life.
- Do not allow grout to harden on the face of the tile. Clean promptly.
- While cleaning change frequently the water. Change cleaning cloth/ sponge when they are impregnated with grout.
- Do not allow water to flow/run into un-grouted joints while application.
- Protect from direct rainfall/ foot traffic for at least 24 hours.
- In case of grouting natural stones, it is necessary to execute a preliminary test, in order to verify the absorption of color by the stone slabs. To avoid this problem, mask the tiles before grouting. A sealer or grout release may be required.
