

OVERVIEW & BENEFITS:

Tenax Cera Fluida is a concentrated solvent-based liquid wax formulated with special white and extra-pure waxes. It provides maximum gloss, restores polish, and does not create surface films. Suitable for polished, honed, brushed, and rough stone surfaces. (Data referenced from Tenax product sheets).

KEY FEATURES:

Gives maximum gloss to polished stone surfaces.

Creates a natural effect without forming surface films.

Deep penetrating formula for long lasting shine and durability.

Dries very quickly and provides immediate shine after buffing.

APPLICATION PROCESS:

Surface Preparation

- Ensure the surface is completely dry and clean; the presence of water, dust, or dirt can cause a non uniform finish.
- Check that the area is free from oils, residues, or contaminants before application.
- When treating a surface for the first time, test on a hidden area to evaluate the effect and compatibility.

Application Technique

- Apply the product uniformly using a brush, sponge, cloth, or fleece.
- Do not expose to direct sunlight during application to prevent improper drying or sticky surface.
- After application, allow the wax to dry for a few minutes. If not dried, the wax will not produce shine.
- Once slightly dry, buff the surface thoroughly using a clean cloth or buffing pad.

Curing & Final Finishing

- After buffing, the shine appears immediately.
- Do not walk on the treated surface for 4–6 hours to avoid marking and ensure proper setting.
- Ensure no contact with water during early curing, as it may reduce gloss uniformity.
- For long lasting effects, maintain the surface by periodic cleaning and reapplication depending on traffic and porosity.

TECHNICAL DATA:

Property	Value
Appearance	Transparent liquid
Color	Slight Milky whitet
Density @ 25°C	~0.9 g/cm ³
Base	Solvent-based

COVERAGE:

Material Type	Coverage/L
Standard Coverage per Liter	200-300 Sq. ft.

AVAILABLE SKU:

250ml and 1L

RECOMMENDED USAGE:

Marble

Suitable for increasing polish and restoring shine.

Granite

Enhances polish and color.

Onyx

Recommended for polishing and brightness restoration.

Natural Stones (general)

Effective for glossy and semi gloss finishes.

Quartz / Engineered Stone

Suitable for gloss enhancement.

Agglomerates

Helps increase shine and restore appearance.

Terrazzo

Compatible for gloss restoration and enhancement.

DO'S AND DON'TS:

Do's	Don'ts
Ensure the surface is completely dry and clean before application.	Do not apply on wet, dusty, or dirty surfaces, as this causes uneven results.
Apply the product uniformly using a brush, sponge, cloth, or fleece.	Do not over apply, as excess creates a sticky film.
Allow wax to dry a few minutes, then buff and remove all excess.	Do not leave excess product on the surface; shine will not develop correctly.
Test on a hidden area before full application to evaluate effect and adhesion.	Do not expose to direct sunlight during application.
Store the product sealed and follow professional-use guidelines.	Do not walk on treated floors for 4-6 hours.
Buff again for a higher gloss if needed after drying.	Do not mix with other chemicals.

STORAGE AND SHELF LIFE:

Store in a cool, dry place away from direct sunlight and extreme temperatures. Keep containers tightly sealed. Shelf life is 24 months in original, unopened packaging under recommended storage conditions.

Pidilite Industries Limited, Ramkrishna Mandir Road, P. O. Box No. 17411, Andheri (E), Mumbai - 400 059
